535/1 PHYSICS Paper 1 Oct./Nov. 2022 2½ hours

UGANDA NATIONAL EXAMINATIONS BOARD

Uganda Certificate of Education

PHYSICS

Paper 1

2 hours 15 minutes

INSTRUCTIONS TO CANDIDATES:

Section A contains 40 objective type questions. You are required to write the correct answer A, B, C or D in blue or black ink against each question in the box on the right hand side.

Section B contains 10 structured questions. Answers are to be written in the spaces provided on the question paper.

Do not use pencil except for drawings. Any work done in pencil will not be marked.

Mathematical tables and silent non-programmable scientific calculators may be used.

Acceleration due to gravity, $g = 10 \text{ ms}^{-2}$.

Specific heat capacity of water = $4200 \text{ Jkg}^{-1} \text{K}^{-1}$.

For Examiners' Use Only

Q.41	Q.42	Q.43	Q.44	Q.45	Q.46	Q.47	Q.48	Q.49	Q.50	MCQ	Total
	y 								15 % - d		

SECTION A: (40 MARKS)

Answer all the questions in this section.

1.	The	instrument which applies the hydraulic principle is
	A.	lift pump.
	В.	manometer.
	C.	siphon.
	D.	rubber sucker.
2.	Whi	ch one of the following is the S.I unit for volume?
	A.	ml.
	B.	cm ³ .
	C.	mm ³ .
	D.	m^3 .
3.	A st	ream of fast moving electrons is referred to as
	A.	X - rays.
	B.	Gamma - rays.
	C.	Light rays.
	D.	Cathode rays.
4.	Whi	ich one of the following is an industrial use of X- rays?
	A.	Treatment of cancer.
	В.	Microwave cooking.
	C.	Satellite communication.
	D.	Inspection of welds in steel pipes.
5.	Whic	h one of the following diagrams represents a symbol for a fixed resistor?
	A	В. С. D.
		<u> </u>
	4	
_		-Ci Clareth 12 am is stratched by 2.5 am when a mass of 5 kg
6.	A pı	ece of wire of length 12 cm is stretched by 2.5 cm when a mass of 5 kg inged on it. Find the stretch in the length of the wire when a mass of
	8 kg	is hanged on it.
		12×2.5
		B — cm

D.

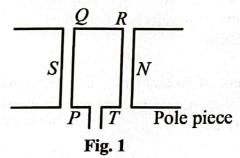

٠.	indi	action when subjected to the sa	als be	ecomes permanently magnetised by			
	A.	Steel.					
	B.	Iron.					
	C.	Copper.					
	D.	Brass.					
8.	The	base of a Bunsen burner is ma	de br	oad in order to			
	A.	make its vertical line through					
	B.	raise its centre of gravity.					
	C.	lower its centre of gravity.					
	D.	reduce its stability.					
9.	Whi	idioactive nucleus of an element ich one of the following represe an α decay by Y?	nt Y is ents a	s represented by the symbol ²⁸⁸ ₉₂ Y tomic number of an element formed			
	A.	288.	B.	92.			
	C.	196.	D.	90.			
10.	Whi plac	ch one of the following characted at twice the focal length of a	terist	ics are for the image of an object cave mirror?			
	A.	real, inverted, magnified.		virtual, erect, diminished.			
	C.	virtual, inverted, diminished.	D.	real, inverted, same size as object.			
11.	Which of the following action(s) should be carried out to reduce the power loss in cables during power transmission?						
	(i)	Use thicker wires.					
	(ii)	Transmit power at high volta	iges.				
	(iii)	Transmit power at high curre	ent.				
	A.	(ii) only.	B.	(i) and (ii) only.			
	C.	(ii) and (iii) only.	D.	(i), (ii) and (iii).			
12.	Whic	ch one of the following shows	elasti	c collision?			
	A.	A rubber ball bouncing off th	ne tab	le and continues moving.			
	B.	A piece of plasticine falling of					
	C.	A moving body colliding wit		tationary body and			
		sticking together after collision	on.				
	D.	A moving body colliding wit		other moving body and			

- 13. A cylinder of base area 4 cm² and height 2 cm has a mass of 20 g. Find its density in gcm⁻³.
 - A. $\frac{20}{4\times2}$.

B. $\frac{4\times2}{20}$

C. $\frac{2\times20}{4}$

- D. $\frac{4}{2\times20}$.
- 14. Figure 1 shows a coil *PQRT* of a galvanometer between its magnetic pole pieces S and N.

When current flows through the coil, which part(s) experience(s) a force that causes it to rotate?

A. Q only.

B. QR only.

C. \overline{RT} only.

- D. \widetilde{PQ} and RT.
- 15. How much work is done when a man lifts a mass of 4 kg vertically through a height of 8 m for 3 s?
 - A. 32 J.

B. 40 J.

C. 320 J.

- D. 120 J.
- 16. Figure 2 shows a displacement-distance curve for waves travelling on a sea.

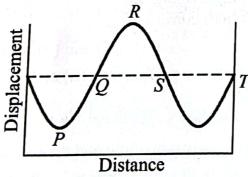

Fig. 2

Which one of the following pairs of points are one wavelength apart?

A. P and R.

B. Q and S.

C. Q and T.

D. \widetilde{S} and T.

					iken
to	reach maximum	height. [Acce	leratio	on due to gravity = 10 ms^{-2} .]	
A. C.	0.5 s. 5.0 s.				
Pol	arisation in a sin	nple cell can l	e min	nimised by	
(i) (ii)	occasionally adding depol	brushing the a arizers which	anode oxidis	plate. se hydrogen to water.	
A.	(iii) only.		В.	(i) and (ii) only.	
C.		only.	D.	(i), (ii) and (iii).	
Wa 4 kl	ter waves are pro Hz. Find the wa	oduced in a ri	pple ta	ank using a vibrator of frequency we if the speed of the waves is 60	ms ⁻¹ .
A.	1.5×10^{-2} m.				
B.	$15.0 \times 10^{1} \text{ m}.$			e fysilijitiska ith tur ura	
C.	2.4×10^2 m.			For the property A	
D.	2.4×10^5 m.				
nails	allow a force	to act on a sn	nall ar	ea and produce large pressure.	harp
B. C.	have small are	ea that reduce	ll area	a and produce small pressure. force exerted and	
D.			es for	ce exerted and hence high pressi	ire.
A cu	boid of dimension	ons 10.0 cm l	y 6.0	cm by 5.0 cm is made of materi	al of
dens	ity 15.0 gcm ⁻³ . \				
A.	4.5 N.				Ty
В.	45N.				
		· ·		The second secon	Para Harris
The li	inear momentun kgms ^{–1} . If the ti	n of a body w ime taken wa	vas un is 2 s,	niformly increased from 3 kgms find the applied force.	-1
Α.	4.0 N.				
B.	7.0 N.				Taranta a
C.	8.0 N.	11/2			
D.	14.0 N.				
	to i A. C. Pol (ii) (iii) A. C. War 4 kl A. B. C. D. Nail nail A. B. C. D. A cu densi cubo A. B. C. D. The li to 11 A. B. C.	to reach maximum A. 0.5 s. C. 5.0 s. Polarisation in a sin (i) occasionally (ii) adding depol (iii) dipping the p A. (iii) only. C. (ii) and (iii) o Water waves are producted to the water waves	to reach maximum height. [Acce A. 0.5 s. C. 5.0 s. Polarisation in a simple cell can be (i) occasionally brushing the se (ii) adding depolarizers which (iii) dipping the plate in concer A. (iii) only. C. (ii) and (iii) only. Water waves are produced in a ri 4 kHz. Find the wavelength of the A. 1.5 × 10 ⁻² m. B. 15.0 × 10 ¹ m. C. 2.4 × 10 ⁵ m. Nails with sharp ends pierce better nails A. allow a force to act on a sma. C. have small area that reduce hence high pressure. D. have large area that increase A cuboid of dimensions 10.0 cm be density 15.0 gcm ⁻³ . What is the tectuoid? A. 4.5 N. B. 45N. C. 4500 N. D. 45000 N. The linear momentum of a body we to 11 kgms ⁻¹ . If the time taken was A. 4.0 N. B. 7.0 N. C. 8.0 N.	to reach maximum height. [Acceleration A. 0.5 s. B. C. 5.0 s. D. Polarisation in a simple cell can be min (i) occasionally brushing the anode (ii) adding depolarizers which oxiding dipping the plate in concentrated A. (iii) only. B. C. (ii) and (iii) only. D. Water waves are produced in a ripple to 4 kHz. Find the wavelength of the	C. 5.0 s. D. 10.0 s. Polarisation in a simple cell can be minimised by (i) occasionally brushing the anode plate. (iii) adding depolarizers which oxidise hydrogen to water. (iii) dipping the plate in concentrated sulphuric acid and then mercury A. (iii) only. B. (i) and (ii) only. C. (ii) and (iii) only. D. (i), (ii) and (iii). Water waves are produced in a ripple tank using a vibrator of frequency 4 kHz. Find the wavelength of the wave if the speed of the waves is 60 A. 1.5 × 10 ⁻² m. B. 15.0 × 10 ¹ m. C. 2.4 × 10 ² m. D. 2.4 × 10 ⁵ m. Nails with sharp ends pierce better than those with blunt ones because sinails A. allow a force to act on a small area and produce large pressure. B. allow force to act on a small area and produce small pressure. C. have small area that reduces the force exerted and hence high pressure. D. have large area that increases force exerted and hence high pressure. A cuboid of dimensions 10.0 cm by 6.0 cm by 5.0 cm is made of materidensity 15.0 gcm ⁻³ . What is the tension in a string that freely supports to cuboid? A. 4.5 N. B. 45N. C. 4500 N. D. 45000 N. The linear momentum of a body was uniformly increased from 3 kgms to 11 kgms ⁻¹ . If the time taken was 2 s, find the applied force. A. 4.0 N. B. 7.0 N. C. 8.0 N.

			I III Series With	the load to				
	A.	measure current th		l				
	В.	increase the p.d across the load.						
	C.							
	D.	increase the currer	it through the l	oad.				
24.				ns an image of height 5 cm. If the cheight of the object.				
		25×5		20×5				
	Α.	20 .	В.	25				
	C.	20× 25		25				
	C.	5	D.	20×5·				
25.	The	coils of a solar heater	are black beca	ause they				
	A.	reflect all the heat e						
	B.	radiate heat quickly		Maka Maka 1 - 19, 10 - 18				
	C.	absorb radiant energ	gy faster and b	etter.				
	D.	retain heat.						
26.				b a tree which is 25 m high.				
	Find t	he average power de	veloped.	불렀 경기가 이 전기가 되는 경독류가				
		ne average power de 20 × 25	missa Abiga	25 × 40				
	Find t A.		veloped. B.	$\frac{25\times40}{20\times10}.$				
	A.	20 × 25	В.	ALL AND				
	A.	$\frac{20\times25}{10\times40}.$	missa Abiga	20×10 ·				
	A. C.	$\frac{20 \times 25}{10 \times 40}$ $\frac{20 \times 10 \times 40}{25}$	B. D.	$\frac{20 \times 10}{20 \times 10 \times 25}$ $\frac{20 \times 10 \times 25}{40}$				
7. V	A. C. When t	$\frac{20 \times 25}{10 \times 40}$ $\frac{20 \times 10 \times 40}{25}$ forces acting on a model	B. D. oving body are	$\frac{20 \times 10}{20 \times 10 \times 25}$ $\frac{20 \times 10 \times 25}{40}$ e in equilibrium, the body

7. V	A. When i	$\frac{20 \times 25}{10 \times 40}$ $\frac{20 \times 10 \times 40}{25}$ forces acting on a model	B. D. oving body are dy slow speed ne at a steady	$ \begin{array}{c} \hline 20 \times 10 \\ \hline 20 \times 10 \times 25 \\ \hline 40 \end{array} $ e in equilibrium, the body l. speed.				

28. Figure 3 shows refraction of light through one face of a glass block at angle of refraction 26°.

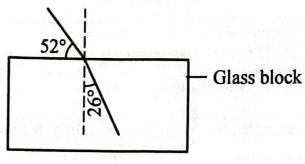

Fig. 3

Find the refractive index of the block.

A.
$$\frac{\sin 90^{\circ}}{\sin \left(26^{\circ}+52^{\circ}\right)}.$$

B.
$$\frac{\sin(90^{\circ}-26^{\circ})}{\sin 52^{\circ}}$$
.

C.
$$\frac{\sin(90^{\circ}-52^{\circ})}{\sin 26^{\circ}}$$

$$D. \qquad \frac{\sin 90^{\circ}}{\sin (52^{\circ} - 26^{\circ})}.$$

- 29. Which of the following properties of cathode rays shows that they possess energy? They
 - (i) affect photographic plates.
 - (ii) cause a small paddle wheel in their path to rotate.
 - (iii) cast a sharp shadow on the screen when an object is placed in their path.
 - A. (i) only.

- B. (iii) only.
- C. (ii) and (iii) only.
- D. (i) and (ii) only.

30. Figure 4 shows three resistors each of resistance 2 Ω connected across a battery of e.m.f 3.0 V.

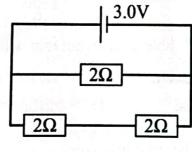

Fig. 4

Find the current supplied by the battery.

A. 0.50 A.

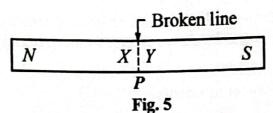

B. 0.75 A.

C. 1.50 A.

D. 2.25 A.

31.		hich one of the following ercury-in-glass thermome	physical	properties is applied in a	
	A. B. C. D.	Length. Pressure. Density.			
32.	W	hich one of the following	sources o	of light is a natural luminou	s object?
	A.	Sun.	В.	Moon.	
	C.	Candles.	D.	Electric lamp.	
33.	W	nich one of the following	sources o	of energy are renewable ene	rgy?
	A.	Solar, Biogas and Tid	lal.		
	B. C.				
	D.	Solar, Nuclear and Bi Solar, Tidal and Fossi			
34.	100	nich one of the following rgy?	devices c	hanges mechanical energy	to electrical
	A.	Motor.	B.	Generator.	
	C.	Microphone.	D.	Loud speaker.	
35.	An elec	electric iron rated 1500 V stricity costs UGX500, ca $\frac{1500}{1000} \times \frac{45}{60} \times 500.$	W is used alculate the	to iron for 45 minutes. If e total cost of using the electron 1500 60 4500	ach unit of ectric iron.
	Λ.	$\frac{1000}{60}$ $\frac{1}{60}$ $\frac{1}{60}$	В.	$\frac{1500}{1000} \times \frac{60}{45} \times 500.$	
	C.	$\frac{1000}{1500} \times \frac{60}{45} \times 500.$	D.	$\frac{1000}{1500} \times \frac{45}{60} \times 500.$	
36.	The	canvas of a tent is able to	o keep ou	t rain water because of	
	A.	capillary attraction.	B.	surface tension.	
	C.	cohesion forces.	D.	diffusion.	
37.	Nucl	ear fission may be used	in		
	(i) (ii) (iii)	X-ray production. nuclear reactors. nuclear bombs.		tobese in second and best to the second and the sec	
	A.	(i), (ii) and (iii).	B.	(i) and (ii) only.	
	C.	(ii) and (iii) only.	D.	(i) and (iii) only.	
12.169	14 1 16 k		8		

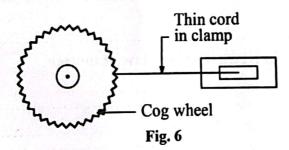

38. Figure 5 shows a bar magnet which is broken at P.

Which one of the following pairs shows the correct polarity at X and Y?

Polarity at X	Polarity at Y
N - Pole	S - Pole.
S - Pole	N - Pole.
N - Pole	N - Pole.
S - Pole	S - Pole.

- 39. Which one of the following is/are application(s) of capillarity?
 - (i) Wick in paraffin stove.
 - (ii) Absorption of moisture by a towel.
 - (iii) Movement of molecules of paraffin from high concentration to low concentration.
 - A. (i) and (iii) only.
- B. (ii) and (iii) only.
- C. (i) and (ii) only.
- D. (i), (ii) and (iii) only.
- 40. Figure 6 shows a toothed wheel rotating and producing sound by a holding cord.

What is the effect of increasing the speed of the wheel?

- A. A decrease in the pitch of the sound.
- B. An increase in the pitch of the sound.
- C. A decrease in the speed of the sound.
- D. An increase in the speed of the sound.

SECTION B

Answer all the questions in this section.
All working must be shown clearly in the spaces provided.

41.	(a)	Sta	ate the Law of moments.	(01 mark)
	•••			
	(b)		t two factors which affect the stability of a body.	(02 marks)
	(c)	Why	does a body thrown upwards eventually come back	
			arphon of theistee by a lowel. O self of molecules of partition and conjuded constition.	kroo
42.	(a)		What is meant by inertia of a body?
